

## **Riser Matters**

IABS and its member groups and choruses are insured for their liability arising out of their negligence and this extends to liability arising from the use of risers. However, it remains each member's responsibility to take care when assembling, erecting or using risers to help prevent any accidents or injury.

- All members or persons involved in erecting and/or dismantling Risers must have received Instruction in the correct and safe handling and maintenance of said Risers
- Each chorus in possession of Risers should have a dedicated team, for the purpose of erecting/dismantling said Risers.
- Visitors and untrained persons should be kept well clear of the erecting/dismantling process by the dedicated team.
- It is the responsibility of each chorus to regularly inspect and maintain their Risers
- Instruction Manuals for specific models of Risers should be acquired by chorus.
